DESCRIPTIVE  
PRICE LIST

*from*

EARL PLATELL  
AURORA, OHIO

In our 1949 catalogue, we are again offering what we consider only the best of the newcomers and the best of the old timers. Naturally, we cannot grow every variety, but we are growing several hundred varieties we do not list. To warrant a listing in our catalogue, a variety must have given us good growth, propagated well and in general, given an all around good performance. We have tried to list faults as well as virtues. Our growing season this year has been extra good. It started early and we had an exceptionally late frost. Bulbs have been showing up very clean. An exceptional number of jumbo bulbs have been dug.

We try to raise quality stock, rather than quantity. Careful attention is given towards getting healthy corm stocks, to drainage, to fertilizing and to irrigation, all according to the best usage. Poor corm stocks are discarded as soon as found. We feel that we increase our quality and lessen chance of disease by digging before the tops are dead, and by very careful handling in the field and in storage to prevent bruising and other mechanical injury. Spraying or dusting in the field, and treatment in storage are all according to the latest up to date practices. The bulbs are rouged and whenever a questionable plant is found, it is removed immediately.

### 1949 PRICES

On a whole, prices have been reduced throughout our catalogue. Some have been reduced proportionately more than others, reflecting usually, the propagating qualities of the particular variety. On the other hand, labor costs have risen, as have other items like printing, transportation charges, in fact, nearly everything that enters into business. In view of this, please include postage on orders up to \$2.50. On orders over \$2.50 we will prepay transportation charges. Shipments will be made parcel post unless you request express. Express is the safest, and if you wish us to ship express collect, we will include the difference between the parcel post charges and the express charges in extra bulbs.

If you are interested in larger quantities than those listed, write us and we will quote you quantity prices.

### EXPLANATION OF LISTINGS

A variety is listed:

**FAIR ANGEL (Hatch 42)** **85 Days** **400**  
L 3-25c, M 3-15c, S 10-25c, B 50-25c

Fair Angel is the name of the variety.

Hatch is the name of the originator.

42 is the year of introduction.

85 Days is the average growing time for large size bulbs. Smaller sizes will take a little longer, and probably, although not always, will not produce quite as nice a spike.

Then follows a description of the variety mostly from field notes.

L 3-25c is the price for 3 large bulbs. Please do not order less than the quantity shown as it costs us too much to handle the small items. Where marked \*, it indicates jumbo bulbs are available at 10% increase in price. A large bulb is one measuring more than 1¼" in diameter and a jumbo bulb would be one over 2½" in diameter.

**M 3-15c** is the price of 3 medium size bulbs. Here too, we must request that you order in the quantity listed. A medium size bulb is over  $\frac{3}{4}$ " and under  $1\frac{1}{4}$ " in diameter. They will produce saleable flowers. It is a more economical way of starting in with a variety.

**S 10-25c** is the price on ten small bulbs. These will measure  $\frac{1}{4}$ " to  $\frac{3}{4}$ " in diameter and will usually produce bloom and a good size bulb for the next season. They are usually produced from bulblets planted early in the season. Thus you are assured of getting nice bulbs grown from bulblets in two years time. This is the cheapest way of getting a start in a variety, provided you are willing to wait another year's time to get results.

**B 50-25c** This is the price for 50 Bulblets. Bulblets are the cheapest and slowest way of getting results. On the more common varieties, the bulblets are screened over a  $\frac{1}{4}$ " screen. On the scarcer varieties they are put out on a "field run" basis, but we always try to put the largest ones in the package. Germination and growth is very good in some varieties and very poor in others. We have tried to indicate the results in our comments. Some varieties will make only small bulbs the first year, others will make a few medium and large sizes, as well as a number of small ones. A great deal depends on the earliness of planting and the care, water supply, etc. We try to peel, or at least crack the hull on all the higher priced bulblets before we plant them. This helps a great deal in the quick growth. No guarantee of growth or germination is made on bulblets. In planting, we try to plant our bulblets at least 2" apart to give ample room for growth. We plant as early in the spring as we can get the ground worked, planting about  $1\frac{1}{2}$ " or 2" deep. Storing bulblets in a warm room for 6 to 8 weeks before planting sometimes helps to promote quick germination.

## GUARANTEE

We guarantee our bulbs to be true to name and free from disease or thrip. Please open the package and examine them immediately on arrival and if not satisfactory, advise us at once. We make errors once in a while, and if any bulbs are found not as represented, we will replace them (together with something extra for your trouble) or we will refund your money if you will return the unsatisfactory stock. At no time will we be liable for more than the original amount paid for the bulbs. Due to conditions beyond our control, we are not responsible for growth of bulbs or bulblets. All orders are placed with this understanding. The fields and bulbs have been state inspected, and this gives us the added assurance that they are free of disease and thrip.

## SHIPPING

We usually start shipping about March 1st depending entirely on weather conditions. Express is the safest means of transportation. If your express office is different from your postoffice, be sure to note it on the order.

## EARLY ORDERS

We have a good stock of nearly every variety listed, and by placing your order early, you get the pick of the bulbs. If there is a variety you would like to have, and you do not find it listed, we would appreciate your inquiry. We are growing several hundred varieties we do not list, either because we do not have sufficient stock, or perhaps, because we are not satisfied with the performance of the variety. We are in a position to supply nominal quantities of some varieties on your inquiry.

## EXTRAS

We always try to include an extra bulb or so, depending upon the size of the order, to enable you to try out newer varieties.

This year, we are including a marker tag with every variety where the order is for 12 or more bulbs of the same kind and size. If you should order 12 Picardy and 6 Corona, we would include one tag. These are zinc markers and we think you will like them. They are absolutely weather proof, even with an ordinary lead pencil. We have used them for several years and have yet to find a tag at the end of the season that is not readily readable.

## PLANTING INSTRUCTIONS, CARE, ETC.

Included with each shipment will be complete instructions for planting, fertilization, spraying, digging and storage. These instructions have been prepared by the North American Gladiolus Council and are the latest and most up to date information available. Please open package as soon as you get it and store in a cool dry place until planting time.

## MIXTURES

We offer a grand mixture of bulbs for anyone not wanting to keep separate varieties. You will find it well balanced, both as to size and as to color. Naturally, the bulbs will not be labeled, but you will be well satisfied with your purchase, and it will give you satisfaction for the whole season.

	Per 12	Per 25	Per 50	Per 100
Large Bulbs	\$1.00	\$1.85	\$3.00	\$5.00
Medium Bulbs	\$ .75	\$1.25	\$2.25	\$4.00
Small Bulbs	\$ .50	\$ .85	\$1.65	\$3.00

If you have a preference for light or dark colors, indicate it on your order. We can include more of your choice, as the mixture is made up only as the orders are received.

## "COLLECTION OF FAVORITES"

You will like our "Collection of Favorites" and you will find they give you a garden of color and beauty. Recommended for a beginner who is just starting to exhibit at shows. Also recommended for anyone who just wants some beautiful glads for the home and garden.

34 varieties, all good, most of them with excellent show records.

### Special price on the above collection of Favorites:

Six large bulbs of each variety listed above (catalogue value \$20.95) including weatherproof marker for each variety, 204 bulbs, 34 markers for only \$17.50. Each variety is separately labeled and the weatherproof marker will be in the bag with the bulbs. The wire marker holders will be wrapped separately in the box.

This is the best deal in our catalogue for getting a start of all good varieties. An excellent assortment of colors and varieties, as you will see by reading the detailed descriptions in the front of the catalogue.

Half of the above Collection of Favorites—3 each of the 34 varieties listed, all large sized bulbs, **but without weather proof marker**, catalogue value \$10.40 for only \$7.50. Same as the special listed just above, **only 3 bulbs** of each variety and **no marker**. Each variety properly labeled.

For anyone just wanting a lot of good flowers, and not particularly caring for variety names, we suggest the **Mixture**, for one who is getting interested in exhibiting at shows, but who has not reached the real "fan" stage yet, we recommend the special "Collection of Favorites" and for the real "fan", we suggest they pick them out from the newer varieties listed in the catalogue. Usually, the real Glad "fan" knows pretty well what he wants, having seen them at shows or elsewhere.

So, with a word of thanks for your previous orders, and a wish for a grand and glorious 1949 season, we present this, our 1949 catalogue.

- ABU HASSON (Holland 47)** 77 Days 378  
 Very similar in color and growth to *Pelegrina*, except that it seems to have overcome the bad habit of crooking and falling over. Tall growing, straight spikes, clear dark violet blue. If you like dark blue—by all means try Abu Hasson. It's the best in its color class.  
 L 15c, M 10c, S 5c, B 100-20c
- ALGONQUIN (Palmer 39)** 80 Days 536  
 One of the best scarlets, a good cut flower and an excellent exhibition variety. Holds 6 to 8 florets open on a straight stem. A brilliant scarlet with a glow that attracts everyone. If winning ribbons means anything, Algonquin is well up at the top.  
 \*L 3-25c, M 3-15c, S 4-10c, B 100-20c
- AMBERGLOW (Palmer 36)** 85 Days 412  
 A medium sized deep yellow that will hold 6 to 8 open at one time. A good cut flower—an old timer, but still good.  
 L 3-25c (10-50c), M 4-15c(10-35c)
- ANNAMAE (Pommert 40)** 70 Days 400  
 An early pure white is hard to find, particularly one that is a good commercial. Annamae seems to fit the bill in all respects—It's white, it's early, it's dependable.  
 L 3-25c, M 3-15c, S 3-10c, B 100-20c
- AVALON (Marshall 40)** 90 Days 440  
 Ruffled pink with a cream throat, opening 7 or 8 medium large florets. Flowerhead is inclined to be short, but the overall picture is very striking.  
 L 3-25c (12-85c), M 3-15c, S 4-10c, B 100-15c
- BARCAROLE (Palmer 37)** 110 Days 424  
 Unusual in that it is a clean shade of orange with 6 to 7 nicely ruffled florets on a medium length straight stem. Plant it early as it is a late bloomer.  
 L 3-25c, M 3-15c, S 3-10c, B 100-20c
- BEAUTY'S BLUSH (Fischer 47)** 85 Days 440  
 Here is a pink on the light side that will hold 8 open on a nice spike. It seems to grow this way in the field without any pampering. Should win at the shows and make a good commercial. This could almost be classed as a cream or a white.  
 L 50c, M 35c, S 25c, B 10-25c
- BERNECE (Gray 38)** 80 Days 390  
 This might be classed as a bronze although it is actually a deep golden yellow with an orange flaking. Not a big glad, opening 5 on a medium length stem, but it makes up beautifully, particularly for autumn work. It moved readily on the wholesale market.  
 L 3-25c, M 3-15c, S 3-10c, B 100-20c
- BEACON (Palmer 35)** 90 Days 436  
 Any glad that stays on the wanted list with florists for so many years must be good. A bright clear scarlet with a creamy yellow throat—6 to 8 open and a straight long spike are a few of the reasons for Beacon's popularity.  
 \*L 3-25c, M 3-15c, S 4-10c, B 100-15c

\*For Dozen price use ten times price of One

**BENGASI (Cave 43)** 85 Days 530

A grand pink that when it is good is something to marvel over. Opens 8 large florets on a very long flowerhead with about 6 more buds showing color. Twenty or more buds, and a long spike. Inclined to crook at times. Inclined to be spotty in performance, but we have tried to rogue out the poor performers.

L \$1.00, M 50c, S 25c, B 5-25c

**BERNADINE (Errey 48)** 436

A glowing orange scarlet on a beautiful spike. It must be cut as the first bud begins to open as it fades in the sunlight. It opens to a brilliant color, with up to 10 florets open at one time. We think Bernadine is going to be a leader in its class.

L \$2.00, M \$1.25, S 75c, B 4-50c

**BETTY'S CHOICE (Harris 45)** 100 Days 362

A ruffled rosy mauve with a creamy throat, reminding one very much of Coutts Orchid, except for size. Will hold six open on a very good spike. This should be well liked when it becomes better known. Very good attachment.

L 25c, M 15c, S 10c, B 10-25c

**BIG TOP (Rich 42)** 80 Days 541

A very big flowerhead with huge florets of bright pink is probably the reason they called this one Big Top. One of the tallest growing varieties. Frequent winner for longest flower head or tallest spike. A small carmine feather in the throat adds a touch of color.

L 10c, M 4-25c, B 100-25c

**BIRCH RED (Rich 45)** 90 Days 552

A deep red with large florets, a fine color sheen adding materially to its beauty. A very rich shade of red with plenty of sparkle. Should make a good commercial.

L \$2.00, M \$1.25, S 75c, B 10-\$1.00

**BLACK OPAL (Errey 36)** 92 Days 354

Probably the best low priced dark red. Will hold 8 to 10 open at one time on a good spike. A very good cut flower and seller. Has a very good record on the show table.

L 3-25c, M 3-15c, S 4-10, B 100-15c

**BLACK PANTHER (Lins 43)** 80 Days 554

One of the very best black reds, one of the darkest, opening 5 to 7 large, wide open florets on a nice long flower head. It is early, and has a very promising future. Not too expensive either.

L 50c, M 35c, S 20c, B 10-25c

**BLESSED DAMOSEL (Baerman 44)** 95 Days 440

A creamy throat in a glowing shell pink is a beautiful combination. When it will open 6 to 8 large, slightly ruffled florets on a good stem, you have something. Well worth trying.

L 2-25c, M 4-25c, S 10-25c, B 50-20c

**BLUE BEAUTY (Pfitzer 36)** 75 Days 476

Blue Beauty still wins its share of ribbons. It is a medium blue, shading darker towards the edges, holding six open on a tall stem. Makes nice bulblets which propagate readily

L 3-25c, M 3-15c, S 3-10c, B 100-15c

\*For Dozen price use ten times price of One

**BLUE ICE (Butt 45)** 85 Days 577

Here is another blue that comes very close to the blue everyone is seeking. Light medium blue, almost on the violet side, with a pale yellow small cream blotch and a yellow crescent. Well named. Will open 6 large, well placed florets on a tall spike. Bulblets germinate easily. If you like blues, it would pay you to get your start in Blue Ice now.

L \$3.50, M \$2.25, S \$1.50, B 25c

**BLUET (Mitsch 39)** 378

Bluet still stays in the picture because it will hold 6 open and is a nice cut flower variety. A clear blue, with a nice white throat. Very attractive and one of the closest to real blue that we have.

L 3-25c, M 3-15c, B 100-15c

**BUTTERSCOTCH (Langworthy 48)** 90 Days 521

Coral petal margins overlaying a yellow floret—a vivid throat marking. This seems to be one of the coming varieties and you will, we think, be glad you got started with it early. It holds 8 open, 6" florets, about 20 buds on a long flower head. Recommended.

L \$1.00, M 75c, B 6-50c

**BOBBY DAZZLER (Both 42)** 80 Days 520

A red orange, brilliant and clear, with a deep blotch in the throat, ruffled, with pronounced color intensity. Holds 5 to 7 large florets open on a good stem. A vase of Bobby Dazzler is an eye opener.

L 10c, M 8c, S 5c, B 25-15c

**BOISE BELL (Roberts 48)** 98 Days 343

A distinctive new color arrangement. A pink halo, well defined, on a creamy yellow floret, gives you a very unusual floret. We had one spike open 10 in the field, and it had fourteen open before the first wilted. Tall, well balanced tapering spike. You will like it very much. Florets are ruffled, 4 to 4½". Most of the buds show color, adding materially to the already good spike. Bulblets produced some large bulbs.

L \$2.50, M \$2.00, S \$1.00, B 25c

**BOLERO (Leffingwell 41)** 85 Days 525

Probably the most unusual glad in the garden, attracting a great deal of attention whenever shown. A smoky orange with a dark red blotch 5 to 6 florets open on a nice spike. Ruffled, fluted, needle pointed and of a heavy texture. Unusual and entirely different, attractive.

L 10c, M 3-15c, S 10-25c, B 25-15c

**BUCKEYE BRONZE (Wilson 40)** 90 Days 490

Buckeye Bronze was well named, it being a ruffled bronze with a rosy cast. It holds 6 open on a good spike. It is a good show flower winning lots of ribbons. It is an excellent commercial well liked by the florists. If you do not have it, be sure to add it to your collection.

L 3-25c, M 3-15c, S 4-10c, B 100-15c

**BURGUNDY (Scheer 42)** 90 Days 452

A formal spike of crimson rose, with many open. Intense coloring with narrow cream lines on throat petal. Florets well placed, well attached and of good substance. Straight medium height spike with a rather long flowerhead. Good propagator.

L 15c, M 2-25c, S 3-20c, B 50-20c

\*For Dozen price use ten times price of One

- BURMA (Palmer 43)** 88 Days 562  
Burma is one of the best exhibition glads, and is a "must" in any garden. Heavily ruffled, deep rose red, with 8 to 10 florets open on a large husky spike. Nearly all of the buds will show color before one starts to open. A bouquet of Burma is a mass of color and with the large florets, fewer are needed to get the full effect. A beautiful glad.  
\*L 2-25c, M 4-25c, S 10-25c, B 25-15c
- CARNIVAL (Butt 47)** 437  
A large formal scarlet with a pure white throat, in a very unusual but striking color combination. Excellent results from bulblets indicating good propagating qualities. This one has a very promising future. Get an early start.  
L \$1.00, M 60c, S 40c, B 4-25c
- CASABLANCA (Majeski 44)** 95 Days 400  
A tall white with beautifully ruffled florets. Opens 6 to 8 florets on a very strong spike. White is always in demand for a commercial, and here is one that fits the need to perfection.  
L 3-25c, M 3-15c, S 3-10c, B 100-15c
- CHAGRIN (Evans 45)** 82 Days 511  
Red throat markings on a soft clear primrose yellow gives Chagrin a beauty that is all by itself. Medium tall, but very acceptable. Probably makes the largest seed pods of any variety we grow and seems to set seed very easily. Propagates well.  
L 50c, M 30c, S 2-25c, B 20-25c
- CHAMOUNY (Baerman 38)** 85 Days 460  
Deep rose pink, shading deeper in the throat, with a silver line at the edge of each petal adding a touch of distinction to the spike. Easily opens 10 florets on a tall, willowy spike. Chamouny is one of the most popular varieties we grow, is a good show flower and an excellent commercial. Will often win most open on the show table.  
L 3-25c, M 3-15c, S 3-10c, B 100-15c
- CHARMAINE (New 40)** 75 Days 360  
A very clear rose with a darker throat. Opens 5 or 6 florets of good size on a nice spike. Florets are well placed and spike is long, making Charmaine either a good show flower or a good commercial. It is a vigorous grower and a good propagator. Wins at the shows and the florists like it very much. Early.  
\*L 3-25c, M 3-15c, S 3-10c, B 100-15c
- CLINGENDAAL (Byvoet 39)** 80 Days 350  
About the earliest light red we grow. The only fault we can find with it is the brownish spot in the throat which somewhat distracts from its otherwise good color. It is early, a good propagator, makes immense spikes for a 300 glad and produces large bulbs. It moves well on the wholesale market. We are trying a number of crosses on Clingendaal, hoping to be able to carry its vigor and strength into its offspring.  
\*L 3-25c, M 3-20c, S 3-15c, B 100-15c
- COLOR MARVEL (Krueger 46)** 80 Days 390  
An unusual blend of orange and pink, almost on the yellow side. Nearly all visitors call it a yellow. Attractive and very desirable for floral work. Good grower, good propagator and should become popular. It has a small sized floret, but the overall effect is good.  
L 50c, M 35c, S 25c, B 10-50c

\*For Dozen price use ten times price of One

- CONNECTICUT YANKEE (Schenetsky 44) 90 Days 441**  
 A well grown spike of Connecticut Yankee is almost a sure winner on the show table. A superb fine pink with a sharp blotch of orange scarlet. Beautiful spikes with 8 or more open, excellent placement on a nice spike. Almost a "must" if you are a show fan.  
 L \$1.00, M 75c, S 50c, B 10-50c
- CONNIE G (Woods 48) 80 Days 506**  
 A wonderful ruffled cream with a texture that is very outstanding. The 6" florets are perfectly arranged on a 20 to 22 bud straight but graceful spike. Good attachment. Will hold 8 or more large florets open with about 8 buds showing color. Its texture, heavy ruffling, good growing habits, and most of all, its fluorescence, rates Connie "G" a comer and it is our recommendation that you get a start on it now. You will hear a great deal about this glad in the future.  
 Any Size \$5.00
- CORONA (Palmer 40) 80 Days 560**  
 Corona is a cream white with a deeper shading in the throat. Each petal has a rose picotee edging. This edging seems to vary but our strain seems to come consistently with a well defined colorful edging. Exceptional cut flower and a good show flower. Highly recommended.  
 \*L 3-25c, M 3-15c, S 10-25c, B 100-15c
- COUTT'S ORCHID (Coutts 41) 85 Days 560**  
 A light, unmarked, orchid rose, with a creamy throat. Sometimes you will find a lighter edging on the large round florets which adds appreciably to its attractiveness. Holds 6 to 8 open and makes a good spike, although attachment is not always the best.  
 L 15c, M 10c, S 5c, B 25-15c
- COVER GIRL (LaSalle Arenius 45) 90 Days 542**  
 A prize winner in a medium pink. 6 to 8 open on a tall straight stem. Its show record is good and its commercial possibilities excellent. Low enough in price to warrant a trial.  
 L 25c, M 15c, S 10c, B 20-15c
- CRACKER JACK (Allen 46) 80 Days 425**  
 Orange, shading to yellow in the throat with a red blotch. Holds six to eight open on a very nice stem. Blooms well from small bulbs and even from bulblets. An excellent commercial and very good for exhibition.  
 L 35c, M 25c, S 15c, B 25-25c
- CRIMSON TIDE (Roberts 45) 90 Days 452**  
 A glowing crimson red, on the deep side, with extremely heavy texture. Small white mark in throat, sometimes extending to the midribs. Opens 5 to 6 heavily ruffled florets on a tall straight stem. Bulblets are hard to germinate.  
 L 75c, F 50c, S 30c, B 6-25c
- CRINKLE CREAM (Ellis 40) 86 Days 410**  
 A large ruffled yellow. One of the prettiest yellows we grow, well liked by the florist trade. Fast becoming a very popular glad. Good spike, 6 open, good color and easy to grow.  
 \*L 15c, M 10c, S 4-25c, B 25-15c

\*For Dozen price use ten times price of One

**DAISY MAE (Lins 45)** 90 Days 521

A strong dependable grower that seems headed for a very good rating both as a commercial and as an exhibition variety. An orange pink color, with a deeper throat almost cherry red. The color could be better, but its all around good habits make it worthwhile. Recommended for trial.

L 35c, M 2-35c S 3-35c, B 25-35c

**DAZZLER (Both 40)** 80 Days 421

Dazzler has one fault, it fades in the sun—Cut when the first floret is just ready to open. When you do this, you are well repaid with a striking scarlet orange. The dark blotch in the throat helps set off its color. Will open 8 to 10 slightly ruffled 5½" florets on a good stem. Reasonably priced.

L 15c, M 10c, S 5c, B 25-15c

**DIADEM (Lines 46)** 75 Days 462

About the only fragrant glad pretty enough and large enough to warrant commercial consideration. It is two tone rose, with a cream throat, blending into an attractive flower. 6 to 8 florets slightly ruffled, well attached on a good spike. Bulblet production fair, germination good. Fragrance is more noticeable after spike has been cut a day or two.

L \$3.00, M \$2.00, S \$1.50, B 3-50c

**DISCOVERY (Baerman 43)** 85 Days 511

A light yellow with pink blush, heavily ruffled. A small bright red star in the throat makes a pretty combination. Makes a tall spike, straight, holding 6 to 8 open.

L 15c, M 10c, S 5c, B 25-15c

**DR. WHITELEY (Riley 43)** 85 Days 516

Carries 5 to 6 large well placed clear yellowish apricot blooms on a tall straight spike. A little gold in the throat gives it a sparkling touch. A good commercial and a good show flower.

L 10c, M 2-15c, S 4-25c B 25-15c

**DONELLA (Wright 47)** 65 Days 340

One of the real early ones. A pink with a white throat, a nice combination of color. Good propagator and a vigorous grower. Will open 5 to 6 florets on a good spike. If you grow for the early market, you should at least try Donella.

L 35c, M 25c, S 2-25c, B 20-25c

**DONNA (Pruitt 40)** 95 Days 416

An outstanding commercial and one that holds its own on the show table. A golden buff, nicely ruffled, with six florets open on a very tall stem.

L 3-25c, M 3-15c, S 3-10c, B 50-15c

**DREAM CASTLE (Lins 43)** 90 Days 340

Will hold 7 to 10 or more florets open on a stiff straight spike. Pure pink with a cream throat. Good commercial and a possible show winner. Bulblet production good, germination good. Inclined to a stubby growth for us, but this can be overcome with plenty of water.

L 25c, M 15c, S 2-25c, B 50-25c

\*For Dozen price use ten times price of One

**ELIZABETH THE QUEEN (White 41) 86 Days 566**

The price on Elizabeth the Queen is now low enough so everyone can afford to have it. Consistent winner at the shows, excellent commercial. Undoubtedly the best lavender on the market today. 6 to 8 nicely ruffled florets open at one time on an excellent stem. Really beautiful, and if you do not have it, put it on your "want" list. To get best results, see that you give it plenty of water.

\*L 10c, M 4-25c, S 10-25c, B 25-15c

**ESSA MARIE (Coutts 46) 85 Days 542**

This one has been somewhat over looked but we feel that it deserves more consideration. A good light, self pink, smooth and soft with nicely rounded florets. Will open six on a good stem. Very attractive.

L 15c, M 10c, S 3-15c, B 25-25c

**EXEMPLAR (Krueger 44) 100 Days 332**

Planted early, this tall, ruffled salmon is a good commercial and a good show flower. Will open 8 to 9 florets on a good stem. Quite a favorite.

L 10c, M 2-15c, S 3-15c, B 25-15c

**FAIR ANGEL (Hatch 42) 85 Days 400**

A creamy white, shading to a deeper cream in the throat. Opens 6 to 8 florets on a nice stem and a good flower head. White is always in demand and Fair Angel fills the bill in both the commercial and exhibition field.

L 3-25c, M 3-15c, S 10-25c, B 100-15c

**FAY (Jack 45) 75 Days 440**

To get good results with Fay, it needs plenty of water. A salmon pink with a cream throat, that opens well in water. 5 to 7 blooms on a good flower head. Moves well on the commercial market because of its ability to open well after cutting.

\*L 15c, M 2-15c, S 3-15c, B 25-15c

**FIREBRAND (Butt 44) 85 Days 452**

A good red. 8 to 10 florets open on an extra nice stem. The glistening shade of medium red, with a fine white stripe on the lower petals, its ability to hold many open, its habit of showing color in many of the buds, their beautiful rosebud shape before they open, its health and ability to propagate well, all add up to a good flower. Rates tops as a commercial and as an exhibition.

\*L. 10c, M 2-15c, S 3-15c, B 25-15c

**FLORENCE NIGHTINGALE (Harris 47) 88 Days 400**

Florence Nightingale is another glad that has lived up to its advance publicity. Beautiful, almost beyond description, glistening white, ruffled, with heavy petalling. Opens 6 to 8 large florets, on a very long flower head and a long spike. Attachment very good. Another white, but a good one.

L \$1.00, M 75c, S 50c, B 2-25c

**FLYING FORTRESS (Wilson 43) 93 Days 586**

A really huge smoky lavender gray, with a bright red feather. Will hold 8 to 10 open at one time and makes a spectacular spike. Strictly a show flower but if you go for the smokies you should have it. Its show record also has many awards for most open and longest flower head.

L 40c, M 30c, S 20c, B 20-20c

\*For Dozen price use ten times price of One

**GENGHIS KAHN (Scheer 41)** 80 Days 432

A beautiful medium pink that is headed for a good commercial market. Heavily ruffled, long flower head, and a good spike. Propagates easily. Opens about 8 florets with about 16 to 18 buds. Very good.

L 35c, M 25c, S 2-25c, B 25-25c

**GERRY (Hatch 46)** 95 Days 400

White, both a commercial and an exhibition glad. Opens up to 10 large florets, ruffled, nicely placed on tall wiry stems. Graceful, and even with its long stem, it works up nicely. A white to keep your eye on.

L \$1.00, M 75c, S 50c, B 10-200

**GLAMIS (Palmer 40)** 90 Days 530

To win against Picardy a glad has to be good. Glamis is in the same class as Picardy and thus runs into really stiff competition. In some other class it would really be outstanding. Clear salmon rose with a cream lip, with 6 large ruffled needle point florets open at one time on a good stem. A splendid cut flower and a good competitor on the show table. Propagates well, bulb-lets often blooming.

L 10c, M 4-25c, S 10-25c, B 50-20c

**GLEAM (Fischer 46)** 77 Days 410

A gleaming light yellow, Waxy texture having unusually thick petals. Opens 3 to 5 5" florets on a medium height stem. Even though it only opens 3 to 5, it makes up nicely either in bouquet or basket work. Propagates well.

L 10c, M 2-15c, S 3-15c, B 50-25c

**GOLDEN ARROW (Pruitt 47)** 85 Days 510

Six or eight, 5½" florets open at one time, six showing color, straight tall spike of a true light yellow give Golden Arrow an edge on most of the yellows that is hard to overcome. Healthy and vigorous, germinates and propagates well, and opens well when cut in tight bud. Commercial possibilities good, show possibilities excellent. Stands hot weather well.

L \$1.00, M 75c, S 50c, B 10-25c

**GRACE ESTELLA (Youmans 45)** 430

Salmon pink, blending into a cream throat, beautifully ruffled, with 6 to 8 open on a tall stem. It has everything it needs and is becoming more popular every season. Reasonably priced for trial

L 25c, M 20c, S 3-25c, B 10-25c

**GRATITUDE (Fischer 46)** 75 Days 424

Ruffled salmon orange with a sharp yellow throat—very interesting as it fits into a needed spot in this color class. Growing habits good, early, and will open 6 on a long spike. If you like Barcarole, you will like Gratitude—It is about 30 days earlier.

L 25c, F 2-25c, S 3-25c, B 25-15c

**GRAY DAWN (Both 43)** 95 Days 486

A sport of Jalna in a light gray. Attractive large spikes with excellent placement. Bulblets are plenty and germinates well. If you like the smokies be sure to look at Gray Dawn.

L 15c, M 10c, S 5c, B 20-15c

\*For Dozen price use ten times price of One

- GREAT LAKES (Kuhn 46)** 70 Days 476  
One of the coming blues with good growing habits, Makes plenty of bulblets that germinate well—often blooming. A light soldier blue, clear and unflecked becoming lighter in the throat. Excellent growing habits.  
L \$2.00, M \$1.00, S 50c, B 5-25c
- GRENADIER (Palmer 44)** 85 Days 416  
A large exhibition buff with 7 or 8 blooms on a tall spike. Florets well placed. Has commercial possibilities as the color and growth are good.  
L 25c, M 20c, S 2-20c, B 20-25c
- GRETA GARBO (Pfitzer 37)** 85 Days 440  
Another old timer that keeps in the running by consistent performance. A soft light rose with a cream lip, a little on the light side. Will open up to 8 large massive florets at one time on a strong stem. One of the top glads even yet. Exceptional as a cut flower and also for shows.  
L 3-25c, M 3-15c, S 3-10c, B 100-20c
- H. R. HANCOCK (Both 43)** 80 Days 462  
Light rosy or cherry red with a cream white throat. Attractive, and with its good placement, its excellent attachment, its ability to hold 6 to 8 medium sized florets open at one time, plus a good spike, you have all the necessary makings of a good commercial. Propagates easily, and for us, bulblets produce mostly size 2, 3 and 4.  
L 2-25c, M 3-25c, S 4-15c, B 100-25c
- HARMAU (Both 40)** 75 Days 533  
A large orange red. It has a rosy overtone which makes it hard to properly classify the color. Florets are slightly ruffled. Well spaced and wide open. 6 to 8 open on a 20 bud tall wiry spike. Good propagator and very early. Try this in a basket and listen for the comments.  
L 3-25c, M 3-15c, S 10-25c, B 100-15c
- HAWKEYE RED (Heaton 44)** 85 Days 450  
A medium red sport of Vagabond Prince, identical in habits and growth—Good propagator and and easy grower—A real commercial red.  
L 10c, M 3-15c, S 6-25c, B 100-15c
- HEART'S DESIRE (Fiedler 48)** 540  
A fine pink color with a performance that leaves little to be desired. Heavily ruffled, good flower head and good spike, make this one imposing. We think you will see a lot of Heart's Desire in the next few years. In a stiff class at the shows, but will hold its own readily.  
L \$2.00, M \$1.75, S \$ 1.50, B 25c
- HIHAT (Lins 45)** 100 Days 430  
An orange pink whose biggest fault is its lateness. Will hold 6 open on a good stem, with most of buds showing color. Not high priced, worthy of a trial.  
L 35c, M 25c, S 10c, B 10-25c
- HUNTRESS (Jack 45)** 75 Days 466  
Earlier by two weeks than Minuet and much easier to propagate. A good lavender on the pink side—Opens up to 8 florets on a good spike. Should be popular in the commercial markets when it becomes lower priced.  
L 35c, M 25c, S 15c, B 10-20c

\*For Dozen price use ten times price of One

**HURRICANE (Evans 42)** 78 Days 424

Seems to grow well under adverse conditions. Bittersweet orange with a light cream throat. Large ruffled florets of good substance. Good stem with well placed florets. Moves well on the wholesale market. Very good.

\*L 3-25c, M 3-15c, S 4-10c, B 100-15c

**INTRUDER (Graff 44)** 90 Days 536

Brilliant scarlet with a small orange feather on the lower petal. Large 6" florets, 18 to 20 buds with 8 or 9 open on a medium height spike. Opens well in water and stands handling. Recommended for trial.

L 75c, M 50c, S 25c, B 12-25c

**IRAK (Mitsch 37)** 90 Days 580

A clear gray that works in well with yellow. Opens 5 to 6 large florets on a nice spike. An old timer but still in the picture. Sport of Bagdad.

L 3-25c, M 3-15c

**IVY ROBERTSON (Barrett 43)** 88 Days 440

A tall growing (shoulder high) buff pink with a cerise blotch. Easily holds 8 wide open florets with plenty of buds showing color. A nicely shaped tapering spike makes this a fine commercial. Often wins at shows for the longest flowerhead.

L 20c, M 2-25c, S 3-25c, B 12-15c

**JALNA (Palmer 36)** 88 Days 480

Salmon and ashes of roses combine in this smokie to make a very pleasing combination. Will open 8 well placed florets on a good spike. I was very much surprised this year over the comments on a basket at the Cleveland show. It certainly attracted a great deal of attention.

L 3-25c, M 3-15c, S 3-10c, B 100-15c

**JAY'S JOY (Youman)** 88 Days 422

It is surprising that you do not see more of Jay's Joy. With us, it grows tall spikes with a very nice flowerhead. 5" florets of a beautiful shade of orange, perfectly placed on the spike. White center in throat. Good florists color, and a good commercial.

L 25c, M 15c, S 2-15c, B 25-25c

**JOHAN von KONYNENBURG (K&M 47)** 85 Days 436

Rich glowing vermillion red, opening 8 florets at one time. Blooms are beautiful, well spaced on nice stems. One of the best recent introductions and reasonable enough in price to be in everyone's garden.

L 25c, M 2-35c, S 2-25c, B 6-15c

**JONQUIL (Palmer 34)** 80 Days 312

A deep clear dark yellow, attractive, going well in a mixture with blue. Tall slender spikes, holding about 6 open florets. Early and fits into the early cut flower trade very nicely.

L 3-25c, M 3-15c, S 10-25c, B 100-15c

**KENWOOD (Lins 43)** 80 Days 452

A monotone of red, no marks, blotches or stripes. Large, tall, with nicely rounded florets—a striking and appealing spike. Five florets open on a strong spike. Good propagator.

L 10c, M 2-15c, S 4-15c, B 25-15c

\*For Dozen price use ten times price of One

- KAWATRI (Pupich 47)** 516  
A large creamy buff, with a yellow throat that will hold 7 to 8 open. Edges and petal slightly diffused with pink. The large florets are of heavy texture and are beautifully ruffled.  
L \$1.25, M \$1.00, S 60c, B 2-25c
- KING BEE (Krueger 41)** 85 Days 436  
A clear scarlet framed with a darker edge on the petals. Will open up to 8 on a medium tall spike. Seems to move readily on the wholesale market. A very good cut flower.  
L 3-25c, M 3-15c, S 4-10c, B 100-15c
- KING CLICK (Wilson 41)** 90 Days 552  
One of the very best large scarlets. 6 to 8 large bright scarlet florets open at one time, on a tall strong spike give King Click real class. One of the best in its color class, hard to beat on the show table and an excellent commercial. What more can one ask?  
\*L 2-25c, M 2-15c, S 3-15c, B 25-15c
- KING LEAR (Palmer 38)** 75 Days 570  
A silver edging on the clear deep reddish purple florets makes King Lear a very popular glad. A well grown spike is a hard one to beat on the show table. Good propagator. Very popular with the florists. Beautiful.  
\*L 3-25c, M 3-15c, S 10-25c, B 100-15c
- LADRONE (Palmer 47)** 90 Days 433  
Very similar in appearance to Beacon except for color. Rose Doree shading to scarlet at the tips with a prominent blotch. Large, showy, with strong robust growth. Excellent propagator. Will open 8 with 8 buds showing color. Rates your serious consideration.  
L 75c, M 50c, S 25c, B 10-25c
- LADY ANNE (Buchanan 47)** 67 Days 400  
Lightly ruffled, pure white, with a pale canary yellow throat. Holds 6 to 8 open, with about 6 buds showing color. Early—good commercial possibilities. Reasonably priced for a 1947 introduction.  
L 60c, M 45c, B 5-25c
- LADY JANE (Lake 41)** 85 Days 406  
A cream with a yellow lip, slightly ruffled. Will open 6 to 8 on a good spike. Excellent show flower, winning many firsts, and excellent for commercial use. A vase of Lady Jane is a pretty picture.  
L 3-25c, M 3-15c, S 10-25c, B 100-15c
- LADY LUCK (Harris 44)** 80 Days 540  
A combination of pastel pink or light salmon and cream, making up into a beautiful floret, somewhat on the order of Greta Garbo. 6 to 8 open, good cutting spike, an all around good one. Price is getting reasonable. A beautiful flower that is coming along to replace some of the others in this class.  
L 15c, M 2-20c, S 3-15c, B 25-15c
- LADDIE (Wilson 40)** 88 Days 440  
Light pink, on the rosy side of the color chart. 7 to 9 wide open, lightly ruffled florets open on a tall stem. Inclined to be top heavy, so requires staking if you want to open in the field. A good color and useable anywhere.  
L 3-25c, M 3-15c, S 4-15c

\*For Dozen price use ten times price of One

**LANCASTER (Palmer 44)** 85 Days 470

A clear dark purple, opening 8 to 10 lightly ruffled blooms. Tall straight spike. Give Lancaster a little extra care and you have almost a sure winner on the show table. This is a good florists color and becoming increasingly well liked.

L 25c, M 20c, S 2-25c, B 25-25c

**LANTANA (Palmer 43)** 75 Days 420

A splendid commercial color and variety. Shades of salmon, orange and yellow with 6 open florets on a medium tall stem give this an all around appeal. It could grow a little taller—otherwise very good. Well liked by the florists.

L 3-25c, M 3-15c, S 10-25c, B 100-15c

**LAVENDER AND GOLD (Baerman 43)** 70 Days 366

Here is a glad that everyone likes, the florist as well as the showman. It should be on every want list. Six medium sized frilled florets open on a tall willowy stem. Pastel lavender with a yellow throat. An appealing glad and you will be glad you have it. Priced very reasonable.

L 10c, M 4-25c, S 10-25c, B 100-20c

**LEADING LADY (Johnson 42)** 87 Days 506

A consistent performer, unexcelled for commercial or exhibition purposes. 6 to 8 large florets open on a strong tall stem. Color is light cream, outstanding among the creams and whites. One of the most popular glads today, well rated everywhere. Healthy, good propagator.

\*L 2-25c (12-\$1.25), M 2-15c (12-75c), S 6-25c, B 100-50c

**LEGEND (Fischer 40)** 90 Days 440

Pale pink shading lighter towards a creamy throat. Recurved florets with 6 to 8 open on a tall spike with a good flowerhead. A good pink, one you will like.

L 2-25c, M 3-25c, S 4-15c, B 25-15c

**MAHASKA (Roberts 45)** 423

Mahaska is proving more popular with the florist trade every year—its salmon orange with a rosy red throat, making an ideal color combination. Its performance is somewhat spotty, but when you have a good spike you have to look twice. You can grow this one to startling size if you push it.

L 25c, B 20-20c

**MAID OF ORLEANS (Pfitzer 32)** 80 Days 400

There are many new whites on the market, but Maid of Orleans still gives them plenty of good clean competition. Milky white with a creamy throat. Tall, straight stems. Good propagator and an all around good performer. Sells readily on the commercial market.

\*L 3-25c, M 3-15c, S 3-10c, B 100-15c

**MARGARET BEATON (Twomey 37)** 85 Days 501

A beautiful white with a scarlet blotch, opening 6 to 8 on a tall straight stem. A good commercial and an excellent show flower. This is one of the "must haves" in every garden.

L 3-25c (12-85c), M 3-15c (12-50c), S 10-25c, B 100-15c

\*For Dozen price use ten times price of One

- MARGARET WOOD (Marshall 47)** 80 Days 570  
A very large rose-purple wine colored floret, shading lighter in the throat. Tall, straight stem with 6 to 8 open. Makes up nicely for basket work.  
\*L 40c, M 30c, S 20c, B 10-25c
- MARION PEARL (Benedict 42)** 85 Days 532  
Very attractive—light salmon shading lighter in the throat. Listed as a 400 glad but the florets give the appearance of being bigger. Opens 7 to 9 florets on a tall spike. An excellent show variety. A must for the exhibitor.  
L 50c, M 25c, S 15c, B 10-20c
- MARLENE BOTH (Both 43)** 76 Days 430  
One of the nicest colors we grow—a delicate light salmon pink, with a cream throat perfectly blended into the ensemble. Might almost be called a buff. Just enough ruffling to make it very attractive. Comes on a nice spike.  
L 35c, M 20c, S 2-25c, B 10-25c
- MIGHTY MONARCH (Butt 46)** 88 Days 552  
Probably the strongest grower in the dark reds. A very deep, velvety, red rose, holding at least 8 open on a long husky spike. Very, very good and one you should have by all means. Good propagator, healthy, and a good show flower.  
L 75c, M 50c, S 25c, B 5-25c
- MINUET (Coleman 22)** 90 Days 466  
The standard commercial lavender for years, and one that still gives them a run for the money. Will open 5 to 6 good sized blooms on a good stem. Still wins many ribbons.  
\*L 3-25c, M 3-15c, B 100-20c
- MINSTREL (Palmer 44)** 85 Days 566  
A beautiful shade of lavender, in a large size. Only opens 4 or 5 florets but the general picture is good. Good spike.  
L 50c, M 35c, S 15c, B 10-25c
- MISS VERMONT (Hatch 45)** 80 Days 540  
A pale light pink, tinted with lavender shading somewhat deeper in the throat. Will open up to 8 on a tall straight spike. In a class with lots of competition is probably why it doesn't get full recognition.  
L 25c, M 20c, S 2-20c, B 20-15c
- MISS WISCONSIN (Krueger 43)** 90 Days 460  
A startling shade of lavender rose that hits you right in the eye the first time you see it. 6 to 8 ruffled florets open at one time on a good stem. Good florists color and an excellent exhibition variety. Fair propagator.  
L 35c, M 25c, S 2-25c, B 20-20c
- MORNING STAR (Van Prooyen 48)** 85 Days 500  
A white sport of Picardy, its growth and habits are the same as Picardy. Wide open flared florets are very attractive. 6 to 8 open, 4 in color, on a spike that is straight and tall. Picardy sport, and its habits and growth are very similar. A fine pure white.  
L \$4.00, B 10-\$4.00

\*For Dozen price use ten times price of One

- MRS. E. BOTH (Both 43)** 80 Days 530  
A blend of a clear light orange pink, with a harmonizing clear throat, well rounded 7" florets, 8 open make Mrs. E. Both an eye-ful any time you look at it. Inclined to be a little stubby with us, but when you get a good one, you have something to boast about.  
L \$1.00, M 75c, S 50c, B 10-50c
- MRS. R. G. ERREY (Errey 48)** 554  
An Australian origination in a dark red that is one of the outstanding dark reds of today. Tall spikes, large blooms, but they are beautiful. Opens 10 of a 22 to 24 bud spike. Not too much stock available.  
L \$1.50, M \$1.00, S 50c, B 10-\$1.00
- MRS. MARK'S MEMORY (K&M 41)** 85 Days 570  
A large exhibition purple, with a small carmine throat marking. 5" florets on a tall husky stem. Consistent winner on the show bench and an all around good purple.  
L 3-25c, M 3-15c, S 3-10c, B 100-15c
- MYRNA (Pruitt 39)** 80 Days 400  
When you get a good spike of Myrna, you have a heavily ruffled ivory white with many well placed ruffled florets open, and you have a thing of real beauty. However, it is inclined to be spotty in performance. Otherwise very good.  
L 3-25c, M 3-15c, S 4-10c, B 100-15c
- MYRNA FAY (Lines 46)** 85 Days 466  
An orchid lavender opening many ruffled florets at one time. Long, straight, sturdy spike. Good propagator, bulblets often blooming. Opens well when cut in tight bud, making it a long sought for lavender for the florist.  
L \$1.00, M 50c, S 25c, B 12-25c
- NADIA (Leffingwell 37)** 90 Days 231  
Nadia is one of the best of the small flowering varieties, holding 6 to 8 open on a very good stem. The combination of salmon in the upper petals with yellow in the lower ones makes a pleasing picture. If you are interested in the smaller ones, Nadia, while an old timer, is one you surely should have. Very fine for artistic arrangements.  
L 20c, M 15c, S 10c, B 25-20c
- NEW EUROPE (Blom 47)** 100 Days 436  
Orange scarlet, very wide open large florets, clear and shining. One of the best of the recent European introductions. Healthy, vigorous and propagates very well. Very reasonably priced.  
L 10c, M 5c, B 10-15c
- NEW ZEALAND SPLENDOR (Toons 39)** 95 Days 541  
Bright deep pink, with a rose throat feather. Nice flowerhead, with 5 or 6 open. Florets large and spike good. Good commercial and a frequent winner at the shows.  
L 15c, M 2-20c, S 4-15c, B 20-15c
- OGARITA (Wilson 42)** 90 Days 532  
A husky grower with a nice shade of rose salmon, shading to a golden yellow throat. Holds 8 open on a long flower head and a strong spike. Will often win for the longest flowerhead and tallest spike.  
L 3-25c, M 3-15c, S 10-25c, B 100-15c

\*For Dozen price use ten times price of One

- OHIO NON PARIEL (Wilson 41)** 85 Days 550  
A giant bright clear red, another one of Mr. Wilson's good ones. Opens 6 to 8 large florets on a long flower head. Good for exhibition and for commercial use.  
L 2-25c, M 4-25c, S 10-25c, B 100-25c
- OKLAHOMA (Wilson 45)** 90 Days 386  
For you smokie fans, Oklahoma is one for the "must have" list. Pink lilac, beautifully ruffled. Wide open 5" florets, 7 to 8 open on a 19 bud spike, with excellent substance and texture. Placement is good. Spike is long and straight.  
L 45c, M 30c, S 20c, B 10-25c
- ORANGE GOLD (Marshall 45)** 80 Days 422  
Probably the nearest to a true orange color that we have. An orange gold shading to yellow in the throat with 6 large wide open florets on a very nice spike. Big plant with heavy foliage. Vigorous. Should be very popular as it is a good exhibition and a good commercial. Good propagator and a good bulb maker.  
L 25c, M 15c, S 2-20c, B 10-20c
- OREGON GOLD (Majeski 41)** 110 Days 410  
A very beautiful light yellow that opens 8 to 10 ruffled florets at one time. It is a late bloomer so plant early for shows. As a commercial, it blooms when the good ones are scarce, and thus brings a good price. Opens well in water.  
L 10c, M 4-25c, S 10-25c, B 100-20c
- ORIENTAL PEARL (Carlson 46)** 85 Days 506  
A giant cream that received lots of publicity when introduced and one that lived up to its advance notices. A tall, strong growing cream with 5 or 6 florets opening up to seven inches in diameter. Excellent for exhibition. Good propagator. Try it.  
L 50c, M 40c, S 30c, B 10-50c
- ORPHEUS (Roberts 49)**  
Mr. Roberts has introduced another good one in this strikingly bright salmon orange Orpheus. A clear cut deeper blotch on the cream center helps it immensely. Ruffled, 6 to 7 florets open on a good spike. Increases nicely. Holds color well in warm weather.  
\$1.00 any size, B 2-25c
- PASTEL (Both 42)** 95 Days 486  
Rose gray, with a velvety texture, and with the petals edged with a steel blue rim. Opens 6 florets out of 16 or 18 buds but has a nice flower head. A very pleasing combination of colors and we think you will like it, particularly a "smokie" fan.  
L 25c, M 15c, S 10c, B 20-25c
- PAUL ROBESON (Cave 43)** 454  
A tall growing beautiful dark red holding 7 to 9 florets open at one time. It must be cut in the bud stage as it burns in the sun, otherwise excellent. Good exhibition variety and recommended.  
L \$1.00, M 75c, S 50c, B 5-25c

\*For Dozen price use ten times price of One

**PELEGRINA (Pfizer 33)** 80 Days 378

Many people ask why we still list this one, but they come back time after time and want that "Dark Blue" you had last summer. It crooks, it falls over in the rows but they still like it. We are able to overcome some of its faults by planting deeply and giving it plenty of water. A dark blue, about the darkest there is, 5 to 6 open.

\*L 3-25c, M 3-15c, B 3-10c, B 100-15c

**PERFUME (Brauer 41)** 301

Not very pretty, a creamy white with a small purple feather. Its only real advantage is its fragrance and it is valuable for hybridizing for that reason.

L 10c, M 2-15c, S 3-15c, B 20-10c

**PERSONALITY (Butt 47)** 85 Days 542

Giant florets of a rose shade, somewhat on the quiet side, in an exhibition variety, with commercial possibilities. Good propagator and bulblets make good growth. Spike formation similar to Picardy. Holds 7 open. Plant makes a good growth. Very husky, good keeper.

L \$1.00, M 60c, S 40c, B 10-50c

**PHANTOM BEAUTY (Bastian 47)** 85 Days 540

Here is another one that lived up to its advance publicity. A good clean shell pink, very light, with 8 to 10 open on a nicely proportioned spike. Good propagator. A fine show glad and as it becomes better known, will take more than its share of ribbons.

L \$3.00, M \$2.00, S \$1.50, B 20c

**PICARDY (Palmer 31)** 90 Days 530

Without a doubt, the most popular glad grown. Clear soft salmon with a flesh colored throat. A small rose feather in the throat adds a touch of distinction. 7 to 8 well placed large florets on a long flower head. There has been some complaint about stubby heads, but our stock has consistently grown the long heads. A prize winner and very hard to beat on the show table.

\*L 3-25c (12-85c), M 3-15c (12-50c), S 10-25c, B 100-15c

**PILLAR OF FIRE (Baerman 43)** 100 Days 452

Tall—intense red, one of the better ones. Will open 9 to 12 buds on a tall spike with about a 24" flowerhead.

L 35c, M 25c, S 15c, B 5-15c

**PINK PICARDY (Earl 46)** 88 Days 542

Another Picardy in all ways except as to color. Considerably darker than Picardy and in some respects much better, largely due to its improved color. Performance the same as Picardy.

L 3-25c, M 3-15c, B 100-15c

**H. B. PITT (Both 41)** 80 Days 430

Light orange pink with a nice cream throat. A smooth color with nice stems and good placement reasonably priced. Mixes well with other colors.

L 3-25c, M 3-15c, S 4-10c, B 100-15c

**POET'S DREAM (Fischer 46)** 85 Days 366

A clear lavender, nicely ruffled, shading to a cream throat. A beauty, one you will like at first sight. Will open 5 or 6 of about 18 buds. Spike is good and so is placement and flowerhead.

L 2-25c, M 3-25c, B 15-20c

\*For Dozen price use ten times price of One

- PROSPERITY (Silva 47)** 85 Days 560  
A ruffled sport of Picardy, light rose in color, much different from Picardy. Very attractive, with tall, strong, straight spikes. Well worth trying. Propagates readily, some of the bulblets blooming this year.  
L \$1.25, M 75c, S 50c, B 6-25c
- PURPLE SUPREME (Wilson 42)** 85 Days 470  
A medium purple with fine outstanding qualities. Nicely shaped florets, up to 10, will open on a shoulder high spike. Propagates readily. Superb cut flower and a very good show flower. Being a dark color, insect and bird damage is very noticeable. Pick early and open inside.  
L 10c, M 4-25c, S 10-25c, B 100-15c
- RECARDO (Palmer 37)** 90 Days 490  
A splash of orange scarlet on a smoky rose is a pretty combination. Recardo has this with a nicely growing spike. Well liked for cutting and good for exhibition.  
L 3-25c, M 3-15c, S 3-10c, B 100-15c
- RED CHARM (Butt 39)** 85 Days 452  
A medium shade of red, with 8 to 10 large florets open at one time on a good spike is the reason Red Charm holds its place every year. Fine for both cut flower and exhibition. Probably the best medium red on the market today, certainly so in the lower priced bulbs.  
\*L 3-25c (12-85c), M 3-15c (12-50c), S 10-25c, B 100-15c
- RED CHERRY (Roberts 46)** 70 Days 450  
Light cherry red, with a darker red throat, opening 6 on a good stem. Lighter in color than Red Charm and about two weeks earlier. Tall graceful spike, good color, good habits, and good propagation make this one for both commercial and exhibition. You will like Red Cherry.  
L \$1.00, M 60c, S 40c, B 3-25c
- RED RASCAL (Graff 45)** 83 Days 550  
A ruffled red, about a shade darker than Intruder. A small white rib runs down the center of the throat to the top of the lower petal. Large florets of excellent substance, with 6 to 8 open and good attachment on a tall spike. Opens well when cut in tight bud. Should make a very good commercial.  
L \$1.50, M \$1.00, S 50c, B 3-25c
- REDWING (Wright 48)** 85 Days 536  
A scarlet red that is going places. Produces excellent spikes, plenty of bulblets, and propagates well. Opens 7 to 8 florets on a well balanced spike. Healthy. Recommended for trial.  
L \$3.00, M \$2.00, S \$1.00, B 25c
- RELIANT (Krueger 48)** 115 Days 500  
A real giant among the glad family. A white that is really husky. It will hold six large florets open on a tall spike. If a few more of the buds would be partly open at the time the six florets are open, it would be really nice. It should impart strength in your hybridizing work.  
L \$1.50, M \$1.00, S 50c, B 10-\$1.50

\*For Dozen price use ten times price of One

- RIO RITA (Lins 41)** 95 Days 523  
One of the best in this color class. 6 to 8 florets, ruffled orange, open at one time on a good stem. Burns in the sun so cut with the first one just ready to open.  
L 10c, M 2-15c, S 3-15c, B 50-15c
- ROCKET (Palmer 41)** 85 Days 450  
Rocket holds its own and is very well liked on the commercial market. A vivid scarlet holding 7 or 8 open. Given care, you will have some beautiful spikes.  
L 3-25c (12-85c), M 3-15c (12-50c), B 100-15c
- ROMANY (Youmans 45)** 80 Days 481  
A strawberry colored smoky with a red and blue blotch. A striking and beautiful flower when open. Good grower and good performer—You will see more and more of this one.  
L 25c, M 20c, S 10c, B 10-25c
- ROSA VAN LIMA (Pfitzer 40)** 80 Days 460  
One of the very best in the light rose pink color. Very good commercial, well liked by the florists, and very good on the show table. Will hold 6 to 8 open, good sized florets, good stem, and always dependable.  
\*L 3-25c (12-85c), M 3-15c (12-50c), S 10-25c, B 100-15c
- ROSEA (Errey 40)** 85 Days 560  
A clear rose, of a very attractive shade should make Rosea a very popular glad. Large florets (up to 7") are well carried on a strong straight spike. Can open 6 to 8. Has good show and commercial prospects.  
L 15c, M 10c, B 100-25c
- ROSE O'DAY (Fischer 44)** 70 Days 560  
A very large lavender, on the rose side of the color chart that has proven very attractive. 8 to 10 large florets open at one time, good color in the buds, and ability to bloom from small bulbs and bulblets adds to its value. Good exhibition variety with commercial possibilities.  
L 25c, M 15c, B 25-15c
- ROYAL GARNET (Haring 44)** 80 Days 454  
Royal Garnet performed exceedingly well for us this year and we had some excellent spikes. One of the top dark reds but not too dark to be objectionable for floral use. Wide open florets, good spike, nice growth, and a touch of fire in the throat to liven it up. Cheap enough to be in every collection.  
L 35c, M 25c, S 15c, B 12-20c
- SALMON'S GLORY (Salmon 47)** 80 Days 507  
Creamy white with a small red blotch. Seems to attract a lot of followers. Good performer, nice spikes, well attached florets, but to our way of thinking, not too attractive. Well rated as one of the new European introductions.  
L 25c, M 2-25c, S 4-25c, B 25-25c
- SEASHELL (Roberts 49)**  
Shell pink, lightly ruffled, well textured, with a satiny sheen, 6 florets open on a tall spike. Distinctive and worth trying in your garden. Not just another pink.  
\$1.00 any size, B 2-25c

\*For Dozen price use ten times price of One

- SENSATION (Marshall 39)** 105 Days 560  
 For us last year Sensation bloomed in 85 days. It is a deep pink with a light cream center, a tall spike,—an interesting flower. If you plan for the shows, plant early.  
 L 10c, M 2-15c, S 3-15c, B 100-15c
- SIBONEY (Allen 48)** 90 Days 566  
 Probably Mr. Allen's best introduction and certainly a very good one. Clear lavender, medium in color blending a little deeper in the throat. Florets measure 6 to 7", are beautifully ruffled and strongly attached to the spike. Well placed, good strong, tall spike. Propagates well, and from its winning records at the shows, we feel that our recommendation is justified. Still rather high priced, but worth the money.  
 L \$2.50, M \$1.75, S \$1.25, B 3-\$1.00
- SILENTIUM (Pfitzer 41)** 80 Days 401  
 A tall white very similar to Margaret Beaton except for a lighter throat coloring. Well grown, it will prove hard to beat on the show table. As a commercial, it moves very readily. Early, and very well liked.  
 \*L 3-25c (21-85c), M 3-15c (12-50c), S 10-25c B 100-15c
- SILVER WINGS (Ritsema 44)** 88 Days 500  
 A four star glad if there ever was one—White, beautifully ruffled, holding 6 to 8 open on an excellent spike. A beautiful variety, whiter than Leading Lady. If you grow for commercial—get your start now, if you grow for the shows, do not pass this one up.  
 \*L 20c (12-\$2.00), M 2-25c (12-\$1.25), S 4-25c (12-60c), B 100-\$1.00
- SNOWBANK (Palmer 45)** 85 Days 400  
 A comer in the 400 White class, beautifully ruffled, with a creamy throat. Opens 6 or 7 florets at one time, nice spike, lovely texture. Well liked as a commercial and good on the show table. Be sure to try Snowbank.  
 L 15c, M 10c, B 50-25c
- SNOWFLAKE (Schneeflocke) (Pfitzer 48)** 500  
 A very pure white with large round florets six to eight medium sized florets open on a strong, upright stem. Healthy grower and an excellent propagator. Should make a good exhibition and a good commercial. Ruffled and long flowerhead.  
 L \$1.00, M 75c, S 50c, B 6-50c
- SNOW FLURRY (Clark 48)** 90 Days 400  
 Clean pure white with very little cream. Nicely ruffled, ivory colored buds. Florets are well attached and lie flat against the spike. Handles easily and will make the commercial market easily. Not in the same class as Silver Wings or Leading Lady. Picardy sport, and now and then you will get a pink stripe. Good and well worth trying.  
 L 75c, M 50c, S 35c, B 10-75c
- SNOW GLORY (Hatch 45)** 400  
 A beautiful white, heavily ruffled, that will hold up to ten florets open. Florets are large, well placed and of good substance. Good propagator and bulblets grow readily. Healthy. 18 to 24 buds, good flower head and tall spikes. Try this one.  
 L 25c, M 15c, B 12-20c

\*For Dozen price use ten times price of One

- SNOW CRUISER (Evans 43)** 90 Days 500  
A giant pure white, with no markings. Color very good, growth good, will hold 6 to 8 open. Attachment gives the appearance of being loose, although the florets do not break off easily.  
L 50c, M 25c, S 15c, B 12-20c
- SNOW PRINCESS (Pfitzer 39)** 80 Days 400  
One of the standard commercial whites, really an Ivory white with a cream throat. Holds six open on a good stem, tall grower. A very good commercial variety, well liked everywhere.  
\*L 3-25c (12-85c), M 3-15c (12-50c), S 3-10c (12-35c), B 100-15c
- SNOWSHEEN (Snyder 42)** 75 Days 300  
Tall spikes with snow white florets nicely arranged and carried on a straight spike. A 300 glads so the florets are not large, but the color and the satiny sheen on the floret add a great deal to its overall appearance.  
L 15c, M 2-20c, S 3-15c, B 20-15c
- SPIC AND SPAN (Carlson 46)** 80 Days 432  
Eight open florets on a straight strong stem, with more buds showing color, and a fine, ruffled pink floret accounts for the spectacular record of Spic and Span. Well recommended—should be on your want list by all means. Get your start on this variety now.  
L \$1.75, M \$1.50, S \$1.25, B 10-\$1.00
- SPITFIRE (Evans 42)** 80 Days 432  
A ruffled rosy toned salmon with a white throat, holding 8 open very easily. Spike is tall and strong. Long lasting when cut, making it a fine cut flower variety and for exhibition, it will give them all some good competition. Try it.  
L 50c, M 35c, S 25c, B 6-25c
- SPOTLIGHT (Palmer 44)** 80 Days 413  
One of the leading glads of today. A beautiful medium yellow with a small scarlet feather in its throat. Will hold 6 to 8 open florets on a fine tall strong spike. Distinctive and beautiful. A prize winner in almost every show, and it will make a very good commercial when it becomes more plentiful. Price is low enough to permit a start to be purchased.  
\*L 20c, M 2-25c, S 3-25c, B 25-15c
- ST. EDWARD (Both 40)** 95 Days 436  
Well placed florets in a double row, tall wiry stems, 6 to 8 open and early. What more can you want in a scarlet. Actually, orange scarlet, creamy white in the throat.  
L 25c, M 15c, S 10c, B 25-15c
- STARLET (Baerman 44)** 70 Days 200  
A small ruffled white. Four or five crisp white florets on a tall thin wiry stem. Spotless, good texture, and all around good. If you are a fan for the small ones, be sure to try Starlet. You will like it very much. Very good in arrangements. Early.  
L 15c, M 2-20c, S 3-15c, B 25-15c
- STELLA ANTISDALE (Evans 40)** 80 Days 540  
A light pink with a lighter center, holding 6 to 8 florets open. Florets are large and well placed on a good spike. Moves well on the commercial market. Makes up beautifully in basket work.  
\*L 2-25c, M 3-25c, S 4-20c, B 20-15c

\*For Dozen price use ten times price of One

- STRATHNAVER (Peattie 47)** 84 Days 500  
One of the largest whites today. Pure gleaming white, straight spikes and immensely large florets. Hold 9 or 10 open, on a 20-25 bud flower head. Spike is heavy enough to support the florets. If you are looking for size to hybridize, you must certainly want Strathnaver.  
L \$1.50, M \$1.00, S 75c, B 10-25c
- STYLE PLUS (Wilson 44)** 85 Days 330  
Not too well known, but you have a beautiful combination of pastel shades (light salmon blending to a creamy center) in Style Plus. The ruffling is good, the petal edges heavily and evenly frilled. A competitor for the title of "Most Ruffled" in any show.  
L 75c, M 50c, S 25c, B 10-20c
- SUMMER GAL (Zimmer 44)** 80 Days 542  
Large beautiful blooms, nicely ruffled, of geranium pink with a rose feathering in the throat. The color, plus the holding of 6 to 8 open on an excellent spike, gives you an attention getting spike. A good addition to this color class.  
L \$1.50, M \$1.00, S 50c, B 6-25c
- SUNLIGHT (Spiller 46)** 87 Days 416  
A promising commercial in the buff class. Has a pink cast, permitting it to blend well with other colors. Holds 6 open and is a good keeper. Good health and other habits.  
L 75c, M 50c, S 25c, B 12-25c
- SUNSPOT (Roberts 45)** 80 Days 417  
Nicely ruffled, yellowish apricot buff, with a rose red spot in the throat. Good grower, good spike, with 8 or more open at a time. Winner of many top awards and one that will give them all a stiff run for the top award. Highly recommended and priced within reach of everyone. Good propagator, bulblets germinating well.  
L \$1.00, M 60c, S 40c, B 3-25c
- SUSQUEHANNA (Herridge 43)** 90 Days 416  
Another prizewinner in the creamy buff class. Large plain petaled, light buff, a real beauty. Makes an outstanding flower head, and will hold 8 open on a strong stem. Good commercial and exhibition.  
L 2-25c, M 2-15c, S 3-10c, B 25-15c
- TAHLAHNEKA (Miller 42)** 85 Days 510  
A very large plain petaled medium yellow that has become quite popular. Opens 6 to 8 large florets on tall spikes. Good propagator and bulblets grow readily. One of the largest yellows. Priced reasonably.  
L 10c, B 50-15c
- THEMESONG (Klein 47)** 88 Days 570  
A recent introduction that is destined to go places. Distinct and most unusual in color. Purple, of a very pleasing shade, with a cyclamen purple blotch. 7 or 8 open nicely ruffled florets with most of the buds showing color, on a spike that leaves little to be desired. Placement and attachment excellent. A good exhibition variety and will be a good commercial as soon as the stock becomes lower priced.  
L 60c, M 40c, S 25c, B 6-25c

\*For Dozen price use ten times price of One

**TITAN (Palmer 39)** 85 Days 432

Some of the Titans we saw at the shows this year were outstandingly beautiful. 6 to 8 large (almost in the 500 class) ruffled florets in deep salmon, excellent placement, and a good spike. We have had some very good results on crosses, both on and with Titan. Rating very good, both commercial and exhibition.

L 2-35c, M 2-25c, S 3-25c, B 25-15c

**TOPFLITE (LaSalle 46)** 85 Days 460

This deep rosy pink has not been too widely introduced as yet, but with us, it is an outstanding grower, opening up to 8 florets on a tall wiry spike. Attachment and placement excellent. Excellent rating well deserved.

L \$3.00, M \$2.00, S \$1.00, B 30c

**TRALEE (Krueger 47)** 75 Days 460

A silvery rose that will hold 7 or 8 open on a good spike fills an open spot in this color class. A good propagator, a consistent performer and an early bloomer. Color is good, well liked by the florists.

L \$2.00, M \$1.50, S \$1.00, B 10-\$2.00

**TUNIA'S ELITE (Both 47)** 80 Days 590

A very beautiful new smoky in a bronzy orange, edged with a smoky orange, and a bright fiery red throat blotch. Add 6 to 8 slightly ruffled florets open at one time, a good spike, and if you are a smoky fan, you are a goner for this one. Still a little high priced, but worth it.

L \$2.00, M \$1.25, S 75c, B 15c

**TUNIAS MAHOMET (Both 43)** 75 Days 586

A really fine smoky of a deep velvety smoky plum rose, touched with orange scarlet in the throat. Huge blooms on long flower heads. A really good smoky, well liked and one that should be in every garden. We class it as a beautiful flower.

L 35c, M 25c, S 15c, B 15-25c

**TUNIAS MARVEL (Both 43)** 78 Days 536

A very early scarlet, its blue edging adding immensely to its attractiveness. Holds about 6 open on an 18 to 20 bud flower head. Attractive and worth looking at.

L 20c, M 15c, S 2-15c, B 15-15c

**TUT'S BOTH (Both 43)** 80 Days 422

Deep pastel orange, with a small blue tongue. Opens 6 or 7 large wide open florets on a husky stem. A beautiful color, a great show flower, and has commercial possibilities. Burns in the sun, but if you cut when the first floret is ready to open, the rest of them will open inside very readily and you will have a beauty, one you will be proud to show.

\*L 25c (12-\$2.50), M 15c (12-\$1.50), S 4-35c (12-75c), B 50-20c

**VAGABOND PRINCE (Palmer 34)** 80 Days 391

The best of the lower priced smokies without a doubt. Mahogany brown with a flame colored blotch. Holds six to 8 open, spike strong. Still a winner at the shows, and very good as a commercial. People seem to like it instinctively.

L 3-25c (12-85c), M 3-15c (12-50c), S 10-35c, B 100-15c

\*For Dozen price use ten times price of One

- VICTORY QUEEN (Wilson 45)** 95 Days 430  
 Victory Queen is in a class with lots of hard-to-beat competition, but its color, (salmon orange with a cream throat), its ruffling and its all around attractiveness is at least going to rate well commercially. Good propagator. Well worth a trial.  
 L 50c, M 35c, S 2-35c, B 12-20c
- WANDA (Snyder 41)** 83 Days 406  
 Wanda is a cream sport of Picardy and makes a wonderful cut flower. Tall nicely proportioned spike, with 6 to 8 nicely placed florets open. Commercial and well liked, exhibition and hard to beat.  
 \*L 3-25c (12-85c), M 3-15c (12-50c), S 10-35c, B 100-15c
- WAR PAINT (Kadel 47)** 90 Days 436  
 Dark scarlet, self color, with a darker throat. A comer, in the scarlet class, as it will hold up to 10 open on a long 22 bud spike. Does not burn. A winner at the shows and a coming commercial.  
 L \$2.00, M \$1.50, S \$1.00, B 20c
- WAX MODEL (Krueger 46)** 75 Days 400  
 A good clean white with a small lavender throat spear, somewhat whiter than Maid of Orleans. Holds five open on a 20" flower head. Have yet to find a crooked spike in the patch. Tall, early, good propagator. Well worth trying.  
 L \$1.00, M 75c, S 50c, B 10-\$1.00
- WHITE CHALLENGE (Arnett 47)** 90 Days 501  
 A white with a faint, but perceptible blush of soft rose. Holds 7 to 9 open, large, round, well placed florets. Excellent grower, good propagator. Well worth looking at. Suggest you try it.  
 L \$3.50, M \$2.50, S \$1.50, B 15-\$3.00
- WHITE CHRISTMAS (Fischer 48)** 85 Days 500  
 A very heavily ruffled white that makes a nice spike. Florets are well placed, spike is strong and husky, making a beautiful, attractive picture. One or two had a pinkish cast, possibly due to hot weather, but the majority of them were good. Bulblet production good. Well worth trying.  
 L \$1.50, M \$1.00, S 75c, B 2-25c
- WHITE GODDESS (Roberts 48)** 80 Days 500  
 White Goddess produces large florets of white with a creamy throat on a good spike. Ruffled, early bloomer, good propagator—what more could you ask for. Recommended—you will like it and be glad you bought it. Extra strong plants, growing shoulder high with 7 to 9 open 5½" florets on a 20 or 22 bud spike.  
 L \$1.50, M \$1.00, S 60c, B 2-25c
- WHITE GOLD (Scheer 41)** 70 Days 506  
 A very early, extra large, clear light cream blending to gold in the throat. Averages 5 or 6 huge florets on a tall stem. In a bouquet, you really have an eyeopener, it shows up wonderfully. With a little extra attention in the field, you can produce some wonderful spikes. Healthy, early, good propagator. Good commercial and still a hard one to beat on the show table.

**WHITE MAGIC (Kuhn 47)** 80 Days 500

A heavily ruffled clear white, opening six 5½" florets at one time, with 6 to 8 buds in color. A fine crisp white, tall, 20-24 buds. Worth looking at, as it has wonderful possibilities. Throat has a slight violet tinge.

L \$3.00, M \$3.00, S \$2.00, B 50c

**WILDWOOD (Riley 44)** 460

A lovely pale rose pink with 7 or 8 nice blooms well placed on the spike. Makes a pretty spike, well proportioned, and will make the commercial market in a year or so.

L 20c, M 2-25c, S 2-15c, B 20-15c

**WINSTON (Palmer 41)** 80 Days 406

As far as shows are concerned, Winston is in a stiff color class. It is a clear bright cream white, shading to lemon throat. Florets beautifully waved and ruffled, and with texture unsurpassed. Not as tall, or as big as some of them, but once you see it, you like. One of our favorites and well liked wherever shown.

\*L 3-25c (12-85c), M 3-15c (12-50c), S 10-25c, B 100-20c

**W. R. READER (Turnbul 42)** 70 Days 530

A deep salmon color, almost a scarlet with a light cream center. Recommended. It will hold 6 to 8 large six inch florets open at one time on a straight stem. Dependable grower and fine bloomer.

L 10c, M 2-15c, S 3-15c, B 25-15c

**YANKEE LASS (Schenetsky 46)** 87 Days 440

Watch Yankee Lass for a fine show record as it becomes more widely available. Light pink in a beautiful shade holding 8 to 10 open on a tall well proportioned spike. Leaves very little to be desired as an exhibition variety and will make a good commercial.

L \$2.50, M \$1.50, S \$1.00, B 25c

**YELLOW HERALD (K & M 47)** 80 Days 411

Slightly ruffled in a rich amber yellow. Carmine in throat. We had excellent spikes from No. 5 bulbs, good growth. Bloomed early. Looks like a very good addition to the yellow class and worthy of a trial. Large well opened florets, well placed on a strong, upright stem.

L 30c, M 20c, S 10c, B 6-15c
